

VERSION WITH MARKINGS TO SHOW CHANGES MADE

IN THE CLAIMS:

Claim 6 has been canceled.

Claims 1, 3-5 has been amended as follows:

1. (Amended) A method of attaching at least one Web page to an e-mail message comprising:

- receiving at least one search term;
- issuing a search request to a search engine using the at least one search term;
- receiving the hit list from the search engine;
- retrieving at least one Web page based on the hit list;
- bundling a copy of the at least one Web page into an e-mail message; and
- forwarding the e-mail message to an end-user's terminal wherein the copy of the at least one Web page may be reviewed by the end-user.

3. (Amended) A method of attaching a copy of at least one Web page to a first e-mail message comprising:

- receiving an address associated with the at least one Web page;
- retrieving the at least one Web page;
- bundling [the] a copy of the at least one Web page into the first e-mail message; and
- forwarding the first e-mail message to a user's terminal wherein the copy of the at least one Web page may be retrieved and reviewed by the user at the user's terminal.

4. (Amended) The method of claim 3 further comprises[;]:

- generating the address based upon a request to review the at least one Web page that is linked to a copy of another Web page wherein the copy of the other Web page is bundled in a second e-mail message; and

forwarding the second-email message to the user's terminal wherein the copy of the other Web page may be retrieved and reviewed by the user at the user's terminal.

5. (Amended) A computer readable medium for controlling a system, including a client terminal and a server, so the system's operations comprise:

receiving at least one search term at the client terminal;
bundling the at least one search term into a first message at the client terminal;
forwarding the first message from the client terminal to the server; [and]
issuing the at least one search term as a search request from the server to a search engine;
receiving links to a plurality of Web pages that are associated with the at least one search term at the server;

issuing a request for at least one of the plurality of Web pages;

receiving the at least one Web page by the server;

copying the at least one Web page into at least one e-mail message by the server; and

forwarding the at least one e-mail message from the server to the client.

Claims 7-12 have been added as follows:

7. (New) The computer readable medium of claim 5, wherein the at least one Web page comprises a sub-plurality of the plurality of Web pages.

8. (New) The computer readable medium of claim 7, wherein the at least one e-mail message comprises a plurality of e-mail messages, and at least one of the sub-plurality of Web pages is copied into one of the plurality of e-mail messages.

9. (New) The method of claim 1, wherein the copy of the at least one Web page bundled in the e-mail message may be reviewed by the end-user when the end-user's terminal is not connected to the Web.

10. (New) The method of claim 1, wherein the bundled at least one Web page includes a link to a non-retrieved Web page, wherein the non-retrieved Web page can be retrieved directly via connection to the Internet.

11. (New) The method of claim 10, wherein the non-retrieved Web page can be retrieved upon receiving another search term and issuing another search request to the search engine using the another term.

12. (New) The method of claim 1, wherein the bundled at least one Web page includes a link to another retrieved Web page, wherein a copy of the another retrieved Web page is also bundled into the e-mail message.

forwarding the e-mail message to an end-user's terminal wherein the copy of the at least one Web page may be reviewed by the end-user.

A2 Sub B1 3. (Amended) A method of attaching a copy of at least one Web page to a first e-mail message comprising:

receiving an address associated with the at least one Web page;
retrieving the at least one Web page;
bundling a copy of the at least one Web page into the first e-mail message; and
forwarding the first e-mail message to a user's terminal wherein the copy of the at least one Web page may be retrieved and reviewed by the user at the user's terminal.

C1 cont 4. (Amended) The method of claim 3 further comprises:
generating the address based upon a request to review the at least one Web page that is linked to a copy of another Web page wherein the copy of the other Web page is bundled in a second e-mail message; and
forwarding the second-email message to the user's terminal wherein the copy of the other Web page may be retrieved and reviewed by the user at the user's terminal.

Sub B3 5. (Amended) A computer readable medium for controlling a system, including a client terminal and a server, so the system's operations comprise:

receiving at least one search term at the client terminal;
bundling the at least one search term into a first message at the client terminal;
forwarding the first message from the client terminal to the server;
issuing the at least one search term as a search request from the server to a search engine;
receiving links to a plurality of Web pages that are associated with the at least one search term at the server;
issuing a request for at least one of the plurality of Web pages;
receiving the at least one Web page by the server;

copying the at least one Web page into at least one e-mail message by the server; and forwarding the at least one e-mail message from the server to the client.

Please add the following claims 7-12:

A3 7. (New) The computer readable medium of claim 5, wherein the at least one Web page comprises a sub-plurality of the plurality of Web pages.

Sub 169 8. (New) The computer readable medium of claim 7, wherein the at least one e-mail message comprises a plurality of e-mail messages, and at least one of the sub-plurality of Web pages is copied into one of the plurality of e-mail messages.

C1
amh 9. (New) The method of claim 1, wherein the copy of the at least one Web page bundled in the e-mail message may be reviewed by the end-user when the end-user's terminal is not connected to the Web.

10. (New) The method of claim 1, wherein the bundled at least one Web page includes a link to a non-retrieved Web page, wherein the non-retrieved Web page can be retrieved directly via connection to the Internet.

11. (New) The method of claim 10, wherein the non-retrieved Web page can be retrieved upon receiving another search term and issuing another search request to the search engine using the another term.

Sub 135 12. (New) The method of claim 1, wherein the bundled at least one Web page includes a link to another retrieved Web page, wherein a copy of the another retrieved Web page is also bundled into the e-mail message.
